

♦ Java Basics - Program Questions

1 Basic Input / Output

1. Write a Java program to print **"Hello World"**.
 2. Write a program to print your **name, roll number, and department**.
 3. Write a Java program to read an **integer** and print it.
 4. Read two numbers and print their **sum, difference, product, and quotient**.
-

2 Conditional Statements (if / else)

5. Check whether a number is **even or odd**.
 6. Check whether a number is **positive, negative, or zero**.
 7. Find the **largest of two numbers**.
 8. Find the **largest of three numbers**.
 9. Check whether a given year is a **leap year**.
 10. Check whether a person is **eligible to vote**.
-

3 Loops (for / while / do-while)

11. Print numbers from **1 to N**.
 12. Print **even numbers** between 1 and 100.
 13. Find the **sum of first N natural numbers**.
 14. Print the **multiplication table** of a given number.
 15. Find the **factorial** of a number.
 16. Count the **number of digits** in a number.
 17. Reverse a given number.
 18. Check whether a number is a **palindrome**.
-

4 Number Programs

19. Check whether a number is **prime**.
20. Print all **prime numbers between 1 and N**.
21. Check whether a number is an **Armstrong number**.
22. Find the **sum of digits** of a number.
23. Check whether a number is **perfect**.

24. Generate **Fibonacci series** up to N terms.

5) Pattern Programs

25. Print a **right-angled triangle** using *.

26. Print a **pyramid pattern**.

27. Print a **number pattern** (1 22 333).

28. Print a **reverse star pattern**.

6) Arrays

29. Read and print elements of an array.

30. Find the **sum of array elements**.

31. Find the **largest and smallest element** in an array.

32. Count **even and odd numbers** in an array.

33. Reverse an array.

34. Search an element using **linear search**.

7) Strings

35. Read a string and print it.

36. Find the **length of a string**.

37. Reverse a string.

38. Check whether a string is a **palindrome**.

39. Count **vowels and consonants** in a string.

40. Count the **number of words** in a string.

8) Functions / Methods

41. Write a method to check **prime number**.

42. Write a method to find **factorial**.

43. Write a method to find the **maximum of two numbers**.

9) Basic OOP Programs

44. Create a class and object to display **student details**.

45. Program demonstrating **constructor**.

46. Program using **method overloading**.

47. Program demonstrating **inheritance**.

48. Program using **this keyword**.

♦ **Frequently Asked in Tests**

49. Swap two numbers **without using third variable**.

50. Find **duplicate elements** in an array.
